

Section 1: Each question is worth 0.9 points

- Oliver Green, _____ passionate environmentalist, has dedicated his life to promoting _____ awareness about climate change through _____ community initiatives.
A) a/the/the B) the/a/- C) an/a/- D) a/the/a
- _____ the challenges ahead, Oliver remains optimistic about the future of our planet.
A) Even though B) In spite of C) Nevertheless D) As
- After a long day of volunteering, my energy levels _____.
A) feel depleted B) are recovering C) are boosted D) are low
- Recent studies reveal the positive impacts that renewable energy _____ on reducing carbon emissions, which _____ increasingly discussed in environmental forums.
A) have/has B) are having/have been C) has/has been D) had/had been
- To reduce waste, you _____ consider using reusable bags instead of plastic ones.
A) don't have to B) shouldn't C) can't D) mustn't
- If governments enforce stricter regulations on pollution, they _____ a significant reduction in environmental damage.
A) will achieve B) achieve C) would achieve D) are achieving
- Sophia stated that it _____ essential to act now to protect our planet for future generations.
A) has been/was B) is/feels C) was/has been D) was/felt

A coalition of scientists and activists has launched a new campaign to combat climate change by advocating for sustainable practices. This initiative, supported by various international organizations, aims to raise awareness about the urgency of climate action through educational programs and public outreach. The group plans to utilize innovative strategies to engage communities and inspire individuals to adopt eco-friendly habits. By collaborating with local governments, they hope to implement policies that prioritize sustainability. The data collected from these initiatives will be crucial for informing future climate strategies.

- The campaign aims to _____.
A) Raise awareness about sustainable practices
B) Increase the amount of plastic waste collected
C) Develop new technologies for pollution
D) Encourage cities to ignore environmental policies
- According to the passage, the activists will _____.
A) Work independently from community efforts
B) Focus solely on data collection without action
C) Use innovative strategies to engage the public
D) Implement traditional methods of outreach
- The primary goal of the campaign is to _____.
A) Analyze climate change patterns in urban areas
B) Inspire communities to adopt sustainable practices
C) Establish stricter regulations on carbon emissions
D) Develop new technologies for energy production

Section 2: Each question is worth 1.5 points

11. Modern conservation efforts allow communities to _____ their impact on the environment.
A) measure B) assess C) enhance D) diminish
12. In 2023, she gained _____ recognition for her efforts to promote renewable energy sources.
A) national/for B) global/to C) local/in D) international/in
13. The groundbreaking documentary _____ in theaters this summer, focusing on climate issues.
A) premieres B) debuts C) rolls out D) launches
14. This challenge is quite complex, and I'm unsure how to _____ it effectively.
A) address B) tackle C) manage D) navigate
15. Successful activists understand the necessity of _____ their message clearly to the public.
A) conveying B) refining C) delivering D) presenting
16. Paraphrase the statement: "Many cities are now adopting green technologies that enhance urban living."
A) It is common for urban areas to implement eco-friendly technologies for better living.
B) Most cities have begun to use technologies that improve environmental conditions.
C) Urban centers are increasingly focusing on sustainable technologies for residents.
D) New developments in cities prioritize the use of green technologies for residents' benefit.
17. She expressed that I keep her updated on the project's developments. Choose a synonym for 'updated':
A) to inform B) to refresh C) to modify D) to change

Numerous researchers and advocates are actively addressing the pressing issue of deforestation and its impact on biodiversity. Figures such as ecologist Jane Goodall and author Richard Powers have openly criticized the destruction of forests in their work. On a wider scale, organizations like the World Wildlife Fund (WWF) are advocating for stronger protections for endangered species and their habitats. They are urging governments to enforce policies that prevent illegal logging. While progress is gradual, there is an increasing commitment to preserving natural ecosystems. Educational programs are being introduced in schools to raise awareness about the importance of forests.

18. In this context, 'advocating' refers to _____.
A) actively promoting a cause or initiative
B) opposing harmful practices
C) suggesting new policies for conservation
D) encouraging dialogue about environmental issues
19. Choose the accurate statement:
A) Many advocates support the movement for forest conservation.
B) The campaign has led to immediate changes in logging regulations.
C) Organizations have ignored the issue of deforestation.
D) The campaign has had no impact on public awareness of environmental issues.
20. The phrase 'on a wider scale' suggests that _____.
A) The movement is confined to a few regions
B) The campaign is gaining international recognition
C) The focus is limited to specific species
D) The public is largely unaware of the deforestation issue

Section 3: Each question is worth 2.6 points

21. Environmental science is an important field of study today. The term 'field' in this context refers to _____.
A) A physical area B) A specific branch of knowledge C) A type of job D) A group of people

22. The narrator is _____
A) The most important person in the story B) A side character of the story
C) A villain of the story D) A person who tells the story
23. The term "ecosystem" refers to _____.
A) A specific type of animal B) The interaction of living and non-living things in an environment
C) An organization focused on environmental issues D) A particular geographical location
24. Identify the incorrect statement:
1) Last year, the organization launched its campaign against plastic pollution, which quickly gained traction.
2) Many influential figures were seen promoting their cause on social media.
3) Today, they are expanding their efforts to include community clean-ups.
4) While advocating for changing, the organization are spent little time developing a plan.
A) 1 B) 2 C) 3 D) 4
25. Identify the incorrect statement:
1) Most tropical rainforests are rich in biodiversity.
2) These ecosystems contribute significantly to the planet's oxygen supply.
3) Many experts suggest preserving these areas for future generations.
4) Studies show that deforestation has no affectivity on climate change.
A) 1 B) 2 C) 3 D) 4
26. If the research is verified to be _____, it could provide new insights into climate science.
A) authentic B) erroneous C) misleading D) speculative
27. In light of recent findings, the scientist _____ to modify her approach.
A) agreed B) declined C) hesitated D) refused

The Importance of Bees

Bees play a crucial role in our ecosystem, primarily as pollinators. They help fertilize plants by transferring pollen from one flower to another, which is essential for plant reproduction. Without bees, many of the fruits, vegetables, and nuts we enjoy would become scarce, leading to a significant decrease in biodiversity and food supply. Despite their importance, bee populations are declining due to factors such as habitat loss, pesticide use, and climate change. This decline has raised alarms among scientists and environmentalists, prompting efforts to protect these vital insects. Community gardens and initiatives aimed at creating bee-friendly habitats are being developed to encourage local bee populations. By planting native flowers and reducing pesticide use, people can help support bees and promote a healthier environment.

28. Bees are _____
A) unnecessary for plant reproduction. B) primarily responsible for pollination.
C) a recent discovery in the ecosystem. D) not affected by climate change.
29. In the passage, the term "pollinators" _____
A) refers to animals that harm plants. B) is used to indicate plant species.
C) means creatures that help plants reproduce. D) describes insects that do not benefit the environment.
30. We can see from the passage that _____
A) bee populations are stable and healthy. B) local gardens can help support bee habitats.
C) pesticides have no effect on bee populations. D) all flowers are suitable for bees.

1st Section: Each task is worth 0.9 points

1. A) a/the/the
2. B) In spite of
3. A) feel depleted
4. A) have/has
5. A) don't have to
6. A) will achieve
7. B) is/feels
8. A) Raise awareness about sustainable practices
9. C) Use innovative strategies to engage the public
10. B) Inspire communities to adopt sustainable practices

2nd Section: Each task is worth 1.5 points

11. A) measure
12. D) international/in
13. A) premieres
14. B) tackle
15. A) conveying
16. A) It is common for urban areas to implement eco-friendly technologies for better living.
17. A) to inform
18. A) actively promoting a cause or initiative
19. A) Many advocates support the movement for forest conservation.
20. B) The campaign is gaining international recognition

3rd Section: Each task is worth 2.6 points

21. B) A specific branch of knowledge
22. D) A person who tells the story
23. B) The interaction of living and non-living things in an environment
24. D) 4
25. D) 4
26. A) authentic
27. A) agreed
28. B) primarily responsible for pollination.
29. C) means creatures that help plants reproduce.
30. B) local gardens can help support bee habitats.
